PREFACE

This volume cumulates the monthly issues published from December 1953 to and including November 1954 and completes the forty-second year of the Industrial Arts Index.

No new periodicals were added during this period and none were discontinued. Changes of name and other changes were noted as they occurred in the announcement pages of the monthly numbers of the Index and in the List of Periodicals Indexed.

The rapidly expanding fields of science and technology have necessitated an increase in our staff and it is now larger than at any other time in our history.

In addition to the full-time indexers listed on the title-page of this volume, the work of preparing the Index has been facilitated by the contributions of part-time assistants. As in previous years the work of Doris Dart in indexing chemistry and physics periodicals has been indispensable, and in addition, we are grateful to Jane Capewell Luhks for her work in the fields of electric engineering, electronics, radio and television.
